

## PROFILE

I am a learning engineer with a strong interest in web design and creative digital solutions, complemented by a solid foundation in programming and computer science fundamentals. I am passionate about designing user-friendly, visually engaging web interfaces while effectively managing technical development. I continuously strive to enhance my skills, explore new technologies, and apply both design and programming knowledge to build efficient, reliable, and impactful solutions. I am seeking opportunities to grow professionally through internships or entry-level roles in a dynamic technology environment.

## SKILLS

- Python(Intermediate)
- Java(Beginner)
